

MOHD SOHAIL KHAN

Mumbai, India | +91-7021744274 | sohailrcp@gmail.com | linkedin.com/in/sohaailkhan | github.com/Stack64
| sohaailkhan.vercel.app

Summary

Software Engineer with **2.2 years** building **scalable backend systems and microservices** in production. Proficient in **Java, Spring Boot, Python, JavaScript, RESTful APIs (HTTP, REST, JSON), Apache Kafka**, and **Microservices**. Experienced with **SQL/NoSQL databases, Hibernate ORM/JPA, CI/CD pipelines**, and **AWS**. Built transaction systems handling **150K+ events/hour** at **99.9% uptime**. Hands-on with **GenAI/LLM agentic tools** (GitHub Copilot, Claude, Cline, Cursor) for AI-assisted engineering.

Technical Skills

Languages: Java (8, 11, 17, 21), Python, JavaScript, TypeScript, SQL, PL/SQL, Go (basics)
Backend: Spring Boot, Spring MVC, Spring Data JPA, Spring Security, Hibernate (ORM), RESTful APIs (HTTP, JSON), Microservices
Messaging & Streaming: Apache Kafka, Kafka Streams, Event-Driven Architecture, Hazelcast Distributed Caching
Databases (SQL/NoSQL): PostgreSQL, Oracle DB, MySQL, H2 — Query Optimization, Indexing, Partitioning, Schema Design
Cloud & DevOps: AWS (S3, EC2), Docker, Kubernetes, Jenkins, Azure DevOps, CI/CD Pipelines, Git/GitHub, Maven
GenAI & Agentic Tools: GitHub Copilot, Claude (Anthropic), Cursor, Cline, Gemini, ChatGPT (OpenAI), Tabnine
Testing: JUnit 5, Mockito, JMeter, TDD, Unit/Integration/Performance Testing
Tools & Practices: Postman, Swagger/OpenAPI, Jira, IntelliJ IDEA, Logging & Monitoring, Agile/Scrum, Full SDLC, System Design, SOLID

Experience

Jio Platforms Limited

Software Development Engineer I – Location Based Services

Dec 2023 – Present

Mumbai, Maharashtra

- Architected **15+ Spring Boot microservices** (25+ instances) using **Spring MVC, Hibernate/JPA, and REST APIs (HTTP, JSON)**, achieving **99.9% uptime** with circuit breakers and connection pooling under high-concurrency production load.
- Built **Apache Kafka event-driven architecture** processing **150,000+ messages/hour**, reducing inter-service latency by **30%** and improving fault tolerance via decoupled asynchronous consumers and streaming pipelines.
- Optimized **RESTful APIs** with connection pooling, cutting latency by **22%** and timeout incidents by **18%** across real-time GPS tracking and geofencing services.
- Automated **PostgreSQL/Oracle optimization** (partitioning, composite indexing) across **50M+ records** – **40% faster queries, 28% lower CPU**; deployed **Hazelcast distributed caching** eliminating redundant DB round-trips.
- Developed **demographic analytics REST APIs** for *RetailVista* managing **22,000+ JioMart/Ajio assets**, enabling store placement intelligence and **10-minute delivery** operations nationwide.
- Leveraged **GenAI/LLM tools** (GitHub Copilot, Cursor, Claude, Cline) to accelerate development – automated boilerplate generation, code review assistance, and test scaffolding across microservices.
- Drove full **Agile SDLC** (design, code reviews, testing, deployment); collaborated cross-functionally with product, QA, and DevOps teams.

Software Engineering Simulations – JPMorgan Chase, HPE, Wells Fargo (Forage)

Jan 2026

- Integrated **Kafka + Spring Data JPA/Hibernate** in Spring Boot microservice for financial transaction ingestion; built **REST APIs (HTTP, JSON)** with RestTemplate; verified with JUnit 5 and embedded Kafka.
- Designed normalized **ERD (1NF–3NF)** for financial portfolio system; built **RESTful CRUD APIs** with Hibernate ORM; validated with **Mockito TDD** suite.

Projects

Transaction Notification Service

Java, Spring Boot, Kafka, PostgreSQL, JWT/OAuth, Async

- Built **event-driven payment notification service** handling **10,000+ daily events** using **Kafka async processing** (25% faster); implemented **JWT/OAuth authentication** with role-based authorization for secure transaction workflows.
- Developed **batch export pipeline** for **1M+ transaction records** using pagination and streaming for audit/compliance reporting.

Employee Workflow Platform

Java, Spring Boot, Kafka, PostgreSQL, React.js, Docker, Microservices

- Designed **Kafka workflow engine** processing **50,000+ events/hour** (40% faster); decomposed monolith into **6 DDD microservices** with Docker, reducing release cycle by **30%**.
- Built dead-letter queue error handling with **logging and monitoring**, reducing integration failures by **35%**.

Education & Certifications

Chandigarh Group of Colleges – B.Tech, Information Technology — CGPA: 8.2/10

Jul 2019 – Jun 2023

IBM Java Developer Professional Certificate – Coursera

Nov 2025 – Mar 2026

Spring Boot & React: Scalable Web Apps – LinkedIn Learning

Oct 2025

Software Engineering Simulations – JPMorgan, HPE, Wells Fargo via Forage

Jan 2026

Additional

Languages: English (Professional), Hindi (Native) **Open Source:** Active GitHub contributor (github.com/Stack64)
Strengths: Growth mindset, passionate about challenging projects at global scale, constant drive to learn new technologies
Interests: Distributed Systems, Cloud-Native Architecture, AI/ML-Powered Engineering, FinTech, Digital Payments at Scale
